OCA/USPS-T5-13. Pages 14-17 of SSR-90 document the IOCS sampling system. Please provide more complete documentation of this sample including:

- a. The number of offices in sample and in the universe for each CAG.
- b. The sampling rate and effective sample size for each stratum, by craft.
- c. Description of any changes to the sample design or estimation formulas since the FY1993 IOCS sample.

OCA/USPS-T5-13 Response:

- a. See Attachment 1 to this response.
- b. The employee sampling rate for IOCS offices for each stratum by craft is:

CAG	Clerks, Mailhandlers, City Carriers and Special Delivery Messengers	Supervisors
A /B	3%	4%
C	6%	9%
D	13%	10%
E	24%	16%
F	49%	36%
G-H,J-K	50%	50%

See Attachment 2 to this response for the effective sample size by craft and stratum.

- c. A change in estimation formulas was made to weight tallies to represent facilities not sampled in CAG A but assigned to CAG A as a result of the separation of functions into mail processing and customer services. Prior to the

FY 1992 restructuring, offices had mail processing and customer service under one finance number. Following the FY 1992 restructuring, offices continued using the existing finance number and CAG designation for customer service functions. Mail processing functions were given new finance numbers and moved to CAG A designation. See Notice of the United States Postal Service Concerning the Filing of Errata to the Testimony of Witness Patelunas (USPS-T-5), August 7, 1996.

The sample weighting for customer service offices remaining in CAG C was done as before. The sample weighting for CAG C mail processing facilities assigned to CAG A was modified to reflect different facility and employee sample rates between CAG A and CAG C. In FY 1994, the weighting was modified to reflect both facility and employee sample rates. In FY 1995, no employee sample rate modification was necessary since employees for those facilities were sampled at CAG A rate. However, the weighting was modified to reflect differences in representation of mail processing and non-mail processing facilities included in the IOCS CAG A/B sample. The weighting was based on costs rather than the number of facilities.

OCA/USPS-T5-14. Please refer to page 15 of SSR-90 for a description of the first stage sampling units for the IOCS. This states, "All offices that were in CAG A or CAG B prior to FY 1992 and all Bulk Mail Centers, are included in the sample."

- a. Please confirm that this excludes CAG C offices that were not in sample in FY 1992 but advanced from CAG C to CAG A or B during FY 1993 or FY 1994. If you do not confirm, then please explain how CAG C (or lower) offices that advance to CAG B (or higher) would be represented.
- b. How many offices in CAGs C or lower advanced to CAG B or A since the sample for FY93 was drawn? Of these offices, how many were already in the IOCS office sample in FY 1993?

OCA/USPS-T5-14 Response:

- a. Confirmed.
- b. One hundred eighteen (118) offices advanced from CAG C or lower to CAG B or A since the sample was drawn. Fifty (50) of these offices were in the sample in FY 1993.

OCA/USPS-T5-15. Please provide a table similar to that provided as library reference E-34 in R87-1 that shows historic office advancements and relegation in CAG status for IOCS sample offices up to FY 1995.

OCA/USPS T5-15 Response:

A listing of IOCS sample offices by name and IOCS CAG is attached for FY 1993, FY 1994, and FY 1995, which would allow development of advancements and relegations for those offices for FY 1994 and FY 1995. The Postal Service does not maintain a similar listing for prior years.
